ACKNOWLEDGMENT

We expressed thanks and gratitude to **Ms. Gunjan Sharma** that supported us to complete this project.

We wish to place on our records and deep sense of gratitude to our project guide, **Ms. Gunjan Sharma** for her constant motivation and valuable help throughout the project work.

Finally, we would like to thanks our friends for their cooperation to complete this project

Signature

CERTIFICATE OF ORIGINALITY

This is to certify, that the project title **“MY PORTFOLIO WEBSITE”** submitted by **DIVYE GUPTA (Reg no - 1464999)** is an outcome of my independent and original work under the guidance of my project guide **MS. GUNJAN SHARMA**. I have duly acknowledged all the sources from which the ideas and extracts have been taken. The project is free from any plagiarism and has not been submitted elsewhere for publication.

INTRODUCTION TO PROJECT

My project topic is the website “My Portfolio”. I completed this project within 10 days along with the project report with help of my project teacher Mrs. Gunjan Sharma. I have made this project with the help of HTML, CSS & JAVASCRIPT. The purpose of the website is to have the opportunity to showcase my work and share my passion with other people. As a creative professional, I have shown all my designs that capture the essence of a brand and communicate its message effectively. The website displays whether it's web development, or editing, I always strive for excellence in my work.

On this website, people will find a collection of my best work, showcasing my skills and expertise in various fields. From branding projects to web design, each piece represents my commitment to excellence and attention to detail. Through the website, people will gain an understanding of my capabilities and creativity.

People who are interested and want to work or give work with me can easily download my CV by home page and contact me easily by dropping their details in the form.

I made five tabs in my project Home Tab, About Tab, Projects Tab, Services Tab, Contact Tab.

Home Tab showing a short introduction, the creator of website with a button by which people can download CV and navigation bar is also there which contains five tabs. By visiting this page customer will get a lot of information about developer like his internships, jobs, qualification, experience, etc.

About Tab showing a brief introduction about work, skills and developer. This tab contains navigation bar too which contains five tabs too. All the information people will find on website is explained in this tab. The skills are showed by using bars so user will not feel difficulty in understanding developer`s skills. The introduction is explained in such a way that customer will feel direct intraction with developer.

Projects tab showing more than ten projects done by the developer and also a navigation bar with five tabs. People can check the projects so that they could see

developer work and could believe on him and by displaying that impressive work it will become easy for developer to convince people to work with him. All the website screenshot are attractive. By clicking image it will open in another tab so user can see a big image of projects.

Services showing all the services provided by the developer or provider. This tab contains nine services (video and photo editing, web development, branding, customer support, web designing, creativity, clean codes, quality, design) and also contain a navigation bar with five tabs. Customer will get fully aware about all the services developer provides after visiting this tab.

Contact showing a contact us form which has following columns (name, mobile, email, subject, message) by filling that form person can send his details and information to developer. Form is designed in such a way that user can't submit it empty. While filling form customer gets helps in filling form and after submitting form user get message of form submitted successfully. This tab also contains a navigation bar with five tabs. In the subject customer can tell the subject for which he or she is filling form and in the message column he can explain briefly what service he wants from developer.

HARDWARE & SOFTWARE REQUIREMENT

HARDWARE

Computer hardware includes the physical parts of a computer, such as the case, central processing unit (CPU), random access memory (RAM), monitor, mouse, keyboard, computer data storage, graphics card, speakers and motherboard.

HARDWARE REQUIRED:

- 1) **MONITOR:** A computer monitor, technically termed as a VDC, can be plainly described as electronic device that transmit information from the computer onto a screen, thereby acting as an interface and connecting the user with the computer.
- 2) **KEYBOARD:** The keyboard is a device through which you can enter data or instructions in a computer and it is known as an input device. It looks like a typewriter. It contains multiple keys.
- 3) **MOUSE:** A mouse is a pointing device. It is held in one hand and is moved across a flat surface.
- 4) **CENTRAL PROCESSING UNIT:** The central processing unit (CPU), also known as a microprocessor, acts as the brain of the computer. It controls most of the machine's operations and carries out commands. The major sections of CPU are:
 - Primary Storage Unit
 - ALU
 - Control Unit
- 5) **MEMORY DEVICES:** A computer needs memory to store data. It also needs memory to perform arithmetical operations and storing programs and pictures.

Computer memory is of two types:

- Primary Memory/ Main Memory
- Second Memory/ Auxiliary Memory

SOFTWARE

Software- is a set of instructions. The software also called a program consists of a series of related instructions organized for a common purpose, that tells the computer what tasks to perform and how to perform them.

SOFTWARE REQUIRED:

1. SOURCE CODE EDITOR

- Sublime Text
- Visual Code Editor
- Note pad ++
- Atom

2. BROWSER: A web browser is application software for accessing the World Wide Web or a local website. When a user requests a web page from a particular website, the web browser retrieves the necessary content from a web server and then displays the page on the user's device.

- Google Chrome
- Microsoft Edge
- Opera
- Firefox
- Safari

3. DOCUMENTATION:

- Microsoft Word
- Libre Writer

4. OPERATING SYSTEM:

- Windows
- Mac
- Linux

ABOUT SNAPSHOTS

I love creating beautiful, creative and eye-catching Websites.

I am thrilled to have the opportunity to showcase my work and share my passion with you. Whether it's web development, or editing, I always strive for excellence in my work.

On this website, you will find a collection of my best work, showcasing my skills and expertise in various fields each piece represents my commitment to excellence and attention to detail. I hope that you enjoy exploring my portfolio and gain an understanding of my capabilities and creativity.

I focus on writing clean and efficient code. I also make websites more attractive with effects and transitions.

I use HTML, CSS, JAVASCRIPT languages in my projects.

Enjoy my free time by painting and music.

Thank you for visiting my portfolio website, and I look forward to the opportunity to work with you in the future.

CONCLUSION

I have designed my own website. Not only I have learned the design aspects of web development, but I have also learned how to program in HTML, CSS and JAVASCRIPT. Through evaluating many different websites, I aware of what is effective and ineffective to viewers when designing a website too.

Through this hands-on-project I able to see how well I understood the material presented, and my critical thinking as I developed **MY PORTFOLIO WEBSITE**.
